

My Porsche App provides new features within Apple CarPlay®

11/07/2023 Porsche becomes the first car maker to integrate vehicle functions within an app in Apple CarPlay® to create an innovative, personalised user experience.

Porsche announced today that it is expanding the functionality of the My Porsche App to provide new features within Apple CarPlay®. The sports car maker is the first automotive manufacturer to allow for easier access of vehicle functions within CarPlay®.

"We are excited to further improve the My Porsche App and using the capabilities of Apple CarPlay to deliver a truly enhanced customer experience," says Mattias Ulbrich, CEO of Porsche Digital and CIO Porsche AG. "Technology and digitisation are crucial factors for the enduring fascination of our brand - now and in the next 75 years."

The My Porsche App combined with Apple CarPlay®

The My Porsche App is the hub for the digital management and control of a Porsche vehicle. For example, it shows the state of charge of the vehicle battery, can adjust the air conditioning and send destinations to the navigation system. What's more, the My Porsche App links existing accounts with third-party providers, for example Apple Music®, to the associated apps in Porsche Communication Management (PCM).

The updated My Porsche App combines vehicle functions with the CarPlay® experience, including the ability to show images of the specific model within CarPlay®. Core functions that can be conveniently adjusted even via the My Porsche App include audio settings such as sound profiles, changing radio stations, adjusting settings for climate control and ambient lighting. In addition, these functions can be combined into wellness modes, such as "relax", "warm up" and "refresh", using quick actions in CarPlay®. Customers also gain the convenience of seamlessly controlling various vehicle functions using Siri® while driving their Porsche.

Activating this new Porsche experience is fast and straightforward by scanning a QR code displayed in the PCM. Please note that the My Porsche App must be installed on a compatible Apple device with iOS 14 or later. The My Porsche App will receive regular updates ensuring Porsche customers will get new features in CarPlay as they develop. The functionality makes its debut in the new Porsche Cayenne, available now. After that it will be rolled out to other model lines.

About Porsche Digital

Porsche Digital is the Stuttgart sports car manufacturer's technology and digital unit. Its central task is to find and scale new digital business models and optimise existing products. The Porsche AG subsidiary develops digital products and services and is the driving force behind the start-up ecosystem.

Consumption data

Cayenne SUV Models

Fuel consumption / Emissions

WLTP*

Fuel consumption* combined (WLTP) 13.4 – 10.8 l/100 km

CO emissions* combined (WLTP) 303 – 246 g/km

*Further information on the official fuel consumption and the official specific CO emissions of new passenger cars can be found in the "Leitfaden über den Kraftstoffverbrauch, die CO-Emissionen und den Stromverbrauch neuer Personenkraftwagen" (Fuel Consumption, CO Emissions and Electricity Consumption Guide for New Passenger Cars), which is available free of charge at all sales outlets and from DAT (Deutsche Automobil Treuhand GmbH, Helmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen,
